BIRCH

Mon, Tuesday 18 June

The UEFA European Football championship is an international football tournament. The tournament takes place every four years. Germany are hosting the championship this year. In 2022 the teams went to play the game for the tournament.

History of the European championships

It has been held every four years following the 1960 tournament.

There are ten countries that have won the champion. Italy are the champions, having won the most recent tournament in 2020, beating England on penalties in the final.

Lime and Birch classes really enjoyed spending time together this week!

LIME

Wednesday 19 June

Teams wear different football kits to look different from other teams. The only person who doesn't wear the same uniform is the goalkeeper. My kit is going to be red and blue and green and yellow and stars.

Design Your Own: Football Jersey

They learned about the countries competing in the European Championship and even designed their own kit!
